

# Intrinsically Safe Magnetostrictive Level Sensors Series: MPI

The MPI Series Intrinsically Safe Magnetostrictive Level sensor provides highly accurate and repeatable level readings in a wide variety of liquid level measurement applications. The MPI-R's large, buoyant, and robust float allows for use in harsh applications where fouling or buildup might otherwise be of concern. The MPI-E's lighter weight design allows it to be used in applications where space is limited. The MPI-E Chemical has a chemical resistant coating, allowing for use in corrosive, acidic, or marine environments. The MPI-F's flexible stainless steel stem allows for installation in tall tanks without needing a crane, and the MPI-T's 1" titanium stem provides compatibility in a wider range of corrosive media--including H<sub>2</sub>S--in larger tanks.

## Features

- Class I, Division 1, and Class I, Zone 0 Hazardous Location Rating (cCSAus, ATEX, IECEx)
- Highly accurate and repeatable readings
- RS-485 (Modbus RTU) output
- Rugged and reliable, lengths up to 25 feet (7.62 m)
- Dual level (interface) measurement
- Tank volume or level output, strapping table
- Pairs with MDI display for self-contained, intrinsically safe, level measurement and display system

- ☐ **C** Titanium

## J. Total Stem Length in Inches

- ☐    Min. 48 in. - Max. 300 in.

## K. Temperature Sensor Options

- ☐ **N** None
- ☐ **1D**<sup>▲</sup> Digital Temperature Sensor A, 12 in. from bottom of probe
- ☐ **2D** Digital Temperature Sensors A, B
- ☐ **3D** Digital Temperature Sensors A, B, C
- ☐ **4D** Digital Temperature Sensors A, B, C, D
- ☐ **5D** Digital Temperature Sensors A, B, C, D, E
- ☐ **6D** Digital Temperature Sensors A, B, C, D, E, F
- ☐ **7D** Digital Temperature Sensors A, B, C, D, E, F, G

Note: Temperature sensors B - G are spaced evenly between A and the probe's zero reference, with a minimum of 2 in. required between temperature sensors.

## L. Housing Connection

- ☐ **N**<sup>▲</sup> None
- ☐ **A** 3/4" to 1/2" NPT Reducing Threads
- ☐ **B** Cable Gland (Cable sold separately)
- ☐ **M** 4-pin M12 Micro Connector Male
- ☐ **F** 4-pin M12 Micro Connector Female

# Tank Cloud

## Put Your Tanks In The Cloud

### 1 Remote Sensors

Connect to any 4-20mA signal or APG Modbus sensor for constant access to your data. Access up to 10 sensors on a single connection.

### 2 Use the Internet Backbone

Connect the APG sensor or module to the Internet via landline, radio, cellular, or satellite.

### 3 View Secure Data 24/7

Access sensor data online through our secure portal at [levelandflow.com](http://levelandflow.com). If the Internet is accessible, so is your information.

### 4 Stay Up-To-Date

Program custom alarms - receive email and text (sms) message alerts on your computer, mobile phone, or tablet.

## The Line-Up:

## Online Data Portal

The Tank Cloud data portal, located online at [www.levelandflow.com](http://www.levelandflow.com), displays everything you need to know about your measurement.

Here you can:

- View your current and past readings,
- Manage alarms,
- Configure your sensors,
- and Setup user permissions for others in your organization.

Measurements are sorted by location and grouped into sites. Simply select the site you would like to view, and then choose the sensor. Current readings are prominent in the center of the screen.

Contact us today at 888-525-7300 to set-up a demonstration of our sensors and online software. We are excited to show you how it can impact your business.
