

V200 Screw Drive – Threaded Components

The Most Accurate and Reliable Technology for Measuring Gas, Liquid and Steam...

Developed from aerospace technology, the VERIS Verabar® averaging pitot flow sensor provides unsurpassed accuracy and reliability.

With its solid, one-piece construction and bullet shape, the VERIS Verabar® makes flow measurement leak resistant and precise. The unique sensor shape reduces drag and flow induced vibration. The location of the low-pressure ports significantly reduces the potential for clogging and improves signal stability.

V200S

V200D

V200 Hot Tap	
Pipe Connection	Threaded (NPT)
Mounting Type	Ball or gate access valve
Features and Benefits	• Most commonly used hot tap model • Installation, insertion & retraction without system shutdown • Economical single threaded rod for most applications • Two threaded rods for high pressures • Synchro drive simultaneously rotates both rods (double rod drives only) • Patented, anti-seize orbital bearing aligns threaded rods and eliminates galling • Can mount to existing valves
Applications	• Air (compressed, combustion) • Natural gas • Water (raw, cooling, feedwater) • Steam
Special Designs - Consult Factory	• Custom mounting, lengths, materials, instrument connections, etc. • Short straight run

Synchro-Drive (Option SYN)

Synchro-Drive Description

Designed for pressures greater than ANSI Class 150#, Synchro-Drive is equipped with two drive rods that are coupled together by a protected chain drive system. Turning either drive nut simultaneously rotates both rods.

Synchro-Drive Benefits

95% faster and easier insertion and retraction.
Equal load distribution over both rods maintains sensor alignment and eliminates binding.

3. Enter Flow Conditions

4. Select Model from Page 3

Use the Ordering Information table on Page 3 to determine your model number.

5. Flow Calculation

All VERIS Verabar® applications require a flow calculation to verify the DP, pressure and temperature limits, structural limits and to size the transmitter. VeraCalc is for use by representatives and end users. It is easy to operate and includes steam tables.
