Datasheet EE-PCA

Product Configuration Adapter

EE-PCA

Product Configuration Adapter

The EE-PCA is an adapter kit used to connect E+E measurement devices to a personal computer. Together with the free Product Configuration Software EE-PCS (available at www.epluse.com/configurator), the Product Configuration Adapter enables setup and configuration of various E+E sensors.

The EE-PCA and EE-PCS functionality depends on the E+E measurement device and may include:

- View actual measured data
- Selection of physical quantities and measurement units at the outputs
- Output scaling
- Offset 1 or 2 point adjustment
- Settings of alarm outputs
- Display settings
- Digital communication settings

The scope of supply includes the converter unit, USB and RS232 connection cables and an additional power adapter.

PCA (Product configuration adapter)

External power supply for RS232 only

Connection cable

USB/RS232 interface

Features

Setup

Connection to PC

EE-PCA can be connected to a PC via either USB or RS232 cable.

- For RS232, the EE-PCA shall be powered with the adapter in the scope of supply.
- For connection to an USB port, the power adapter is not necessary.

Connection to E+E device

The connection cable is device specific. It is not included in the scope of supply and shall be ordered separately.

Ordering Guide

	Feature	Description	Code
Hardware	Product Configuration Adapter	E+E Product Configuration Adapter	EE-PCA
	Connection cable (choose according to device)	EE33, EE371, EE381	HA011063
		EE03 (only display of measured values)	HA011056
		EE07	HA011057
		EE671 with analogue output	HA011064
		EE150, EE4x1 with analogue output	HA011065
		EE300Ex, EE100Ex	HA011068

Order Examples

EE-PCA

Feature	Code	Description
Product Configuration Adapter	EE-PCA	E+E Product Configuration Adapter

HA011068

Feature	Code	Description
Connection cable	HA011068	Connection cable for EE300Ex, EE100Ex
